

EINSTEIGEN - UMSTEIGEN - AUFSTEIGEN

With more than 75 000 employees and an international network of over 1 500 offices and laboratories, SGS is the leading company for testing, verifying and certifying worldwide. The SGS Group has been active in Germany since 1920 and is present in around 40 locations throughout the country.

SGS INSTITUT FRESENIUS GmbH is part of the SGS Group Germany. As a major provider of chemical laboratory analyses, SGS INSTITUT FRESENIUS enjoys an excellent reputation among producers, consumers and traders, especially when it comes to the safety and quality of food, drinks and consumer products. Thoroughly tested foodstuffs and consumer goods are awarded with the SGS INSTITUT FRESENIUS quality seal.

In order to support our business segment of **Agricultural Services** in the **German-Danish border** region, we are looking for a

Engineer for field trial services/testing (m/f)

Your responsibility:

- You supervise and plan field trials self dependent (eg, testing of efficacy and residue behavior of pesticides in crop and soil).
- You work according to the prescribed quality systems (GLP Good Laboratory Practice, GEP - Good Experimental Practice).
- You select the trial sites and coordinate the procedures with farmers on whose land the trials take place.
- You perform the sampling of specimens under GLP requirements and the scoring on pathogens, pests and weeds under GEP requirements.
- You assess the plants during their development.
- You operate closely with the study directors or project managers.
- You collect and process the experimental data.

Your profile:

- You have completed a degree in agriculture and you are familiar with the performance of chemical plant protection products.
- You should ideally have several years of experience in practical field research in a government position, in the industry or in a field experimental station.
- You are skilled by basic understanding of procedures in accordance with GLP and GEP standards and to implement these standards.
- You can appeal to certain pests and harmful organisms and weeds.
- You have good computer skills (MS Office, GEP software such as ARM or PIAF).
- You have a very good knowledge of German and English.
- You are in possession of a valid driving license for cars and trailers.

Join us if you are looking for a varied and challenging job in a globally leading company for quality services. An open company culture, flat hierarchies, great promotion opportunities, a dynamic working environment in an international network and customers who provide you with challenging projects are waiting for you in the SGS Group. Please write to us letting us know what salary you expect and when you could start work with us.

We look forward to receiving your application. Please apply via email to Job_70975@sgs.recruitmail.com
